Wastecycle Testimonial

Shepherd Construction has had the pleasure of working with Wastecycle for over three years now. It quickly became apparent that here was a company that could provide the services we required when we required them, but was equally committed to providing practical advice and legislation guidance, and last minute assistance to solve unexpected problems.

Having got to know Wastecycle very well during this time, the reasons behind the Company's thorough professionalism have come as no surprise. From its involvement within the development of construction industry waste management, attendance at industry best practice events, the knowledge and experience of its staff, and their friendly confidence inspiring manner, we have come to expect a great deal from the Company – and it continues to not only meet, but exceed our expectations.

A result of this collaborative relationship was Wastecycle's appointment two years ago as an Approved member of Shepherd's supply chain, and responsibility for all Shepherd projects within the East Midlands area. Since then Wastecycle has helped us greatly with our objective of maximising the waste we recycle, and minimising the waste we landfill, to the extent that together we achieved a high of 96% of waste recycled over a two month period.

We are currently hoping to increase the number of projects we undertake together, and to achieve further improvements in the area of on site waste management, including the recycling of waste plasterboard in nationwide agreement with a major manufacturer – a scheme within which Wastecycle is already a strategic partner.
